LITE PAPER

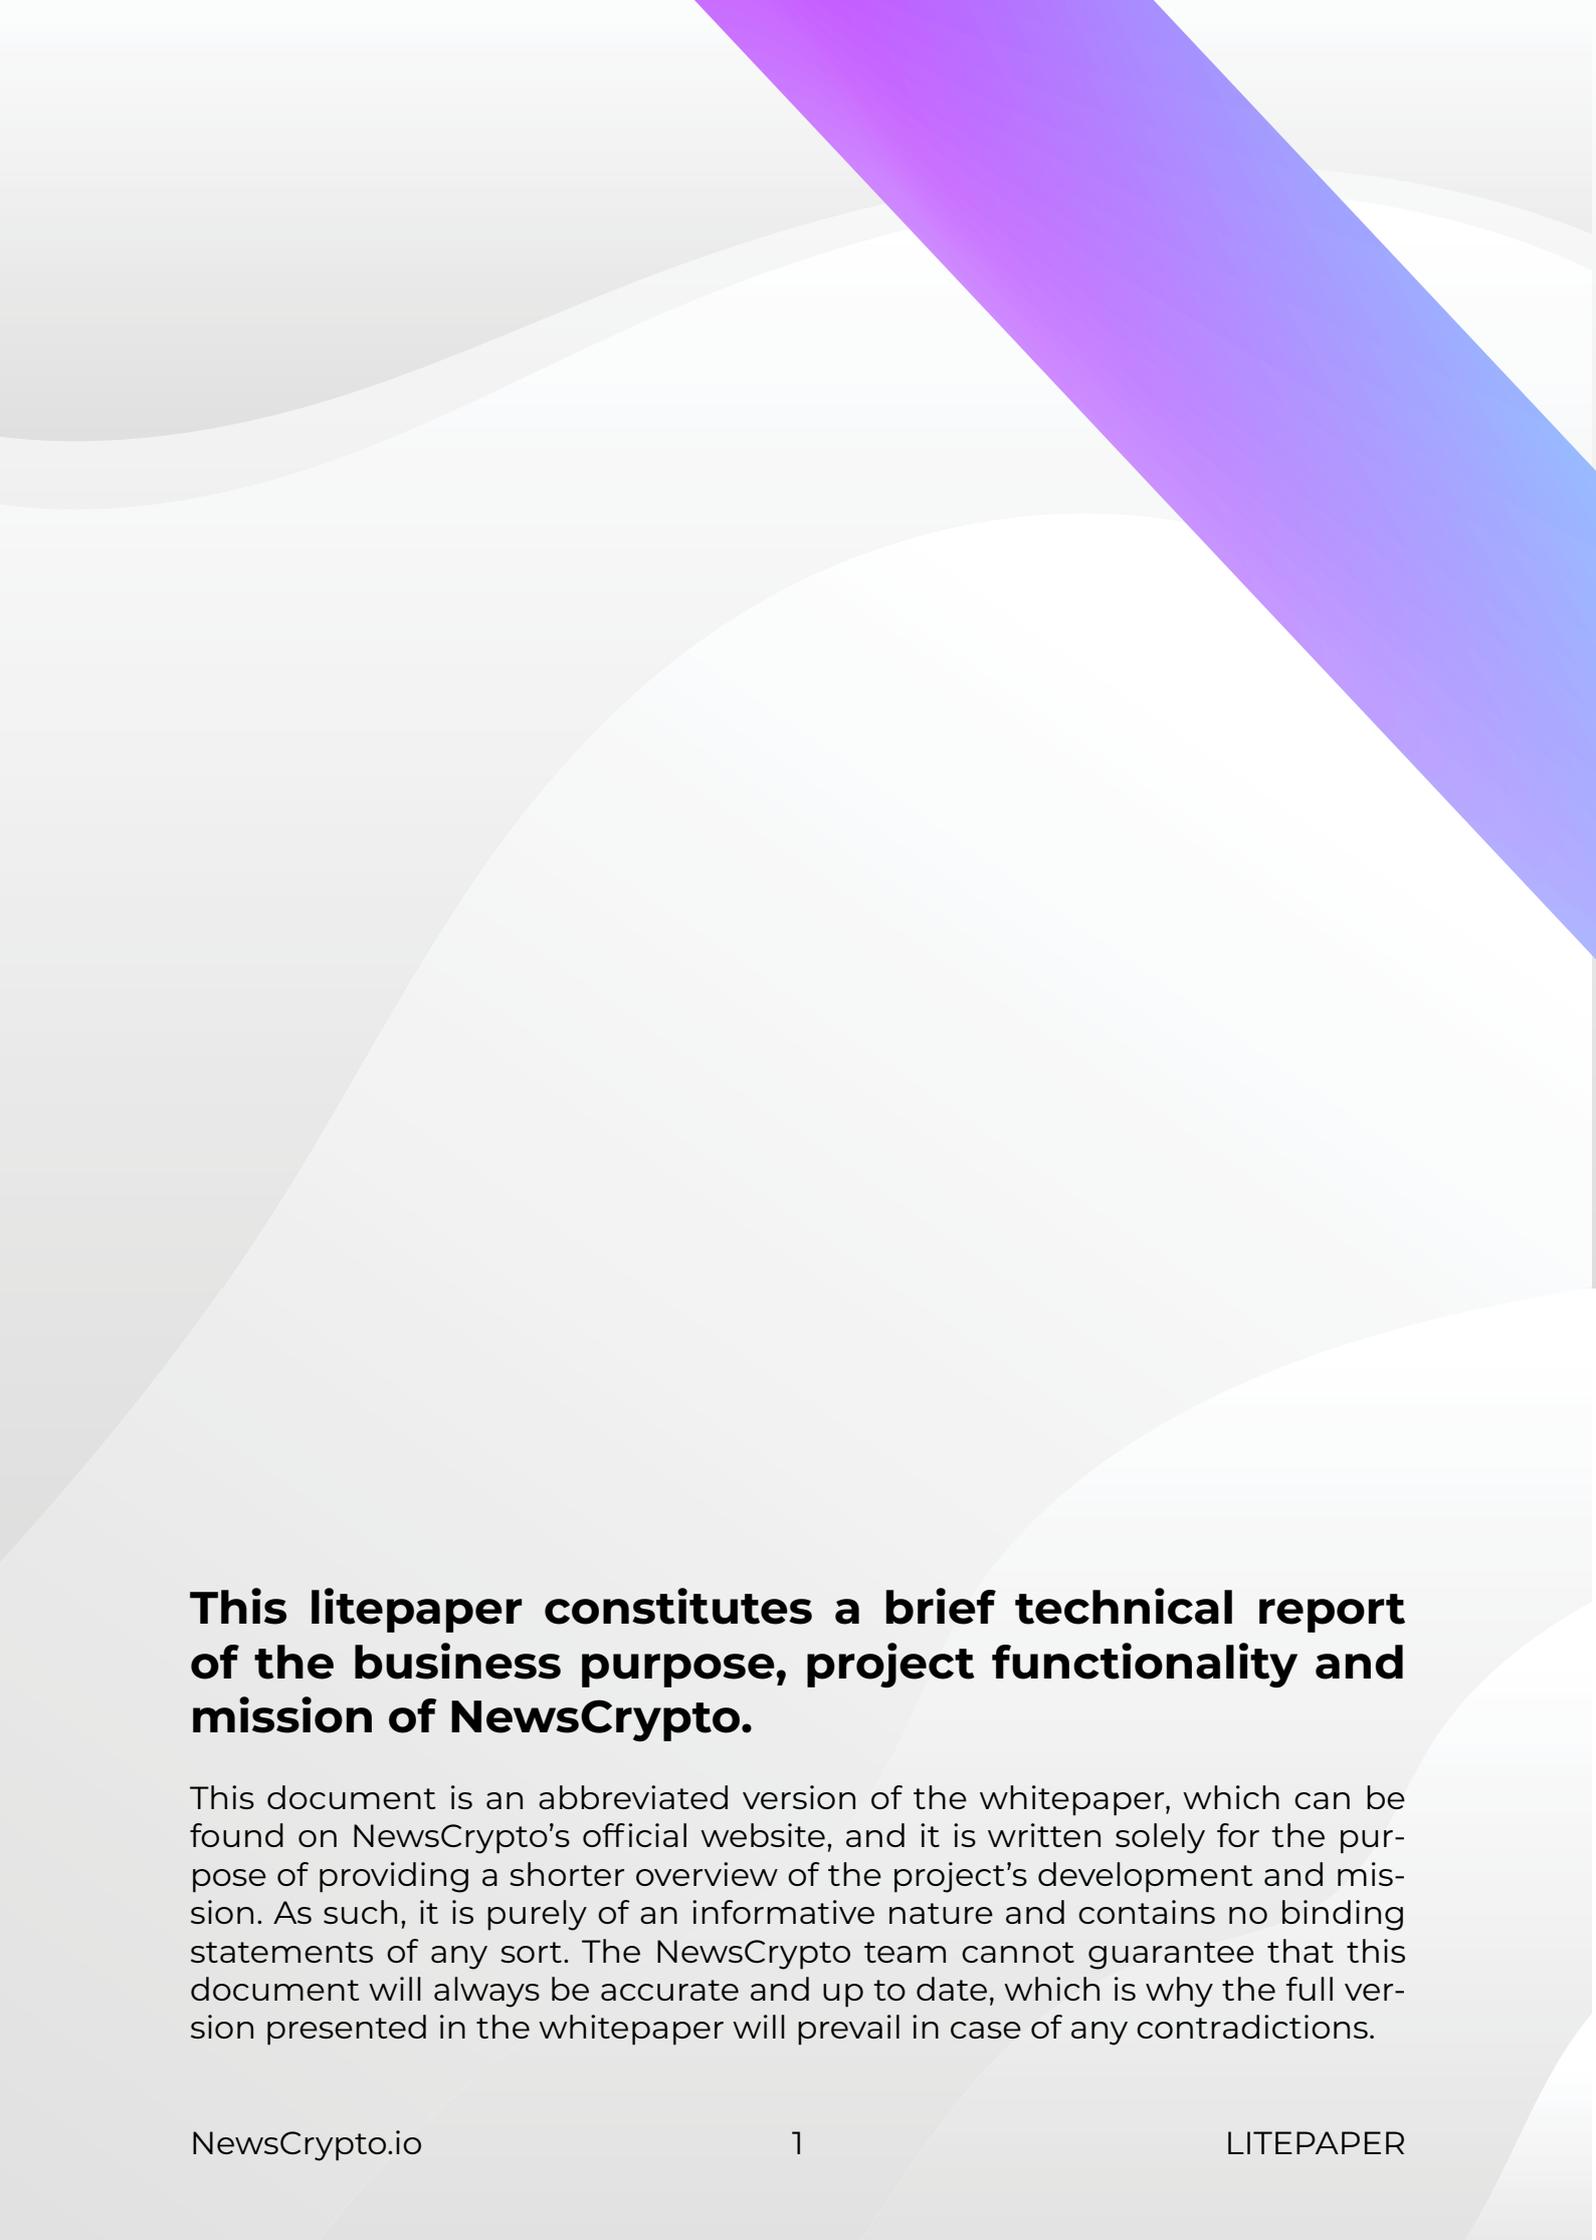

NEWSCRYPTO.IO

BEST PLACE IN THE CRYPTO WORLD
FOR MONEY MAKING DECISIONS

 [@NWCPUBLIC](#)

 [@NWC_PUBLIC](#)

This litepaper constitutes a brief technical report of the business purpose, project functionality and mission of NewsCrypto.

This document is an abbreviated version of the whitepaper, which can be found on NewsCrypto's official website, and it is written solely for the purpose of providing a shorter overview of the project's development and mission. As such, it is purely of an informative nature and contains no binding statements of any sort. The NewsCrypto team cannot guarantee that this document will always be accurate and up to date, which is why the full version presented in the whitepaper will prevail in case of any contradictions.

ABOUT NEWSCRYPTO

NewsCrypto is an all-in-one trading ecosystem that is primarily focused on education, giving both beginners and expert traders alike everything, they need to step into the world of crypto and take their skills to the next level. Recently, the project has expanded to providing novel solutions for DeFi in partnership with different protocols and development-focused projects.

One of the key services of the project is the NewsCrypto Platform, which is an integrated suite that combines data on the cryptocurrency market, educational content, social features and more in one comprehensive product.

The NewsCrypto ecosystem includes professional analysis tools in the field of crypto trading, community-focused social aspects, a payment system, advertisement service, educational tools (including the NewsCrypto Academy and the Unchained Education hub), and on-chain protocols (most notably the Stellar – Polygon bridge).

The NewsCrypto mobile app serves as an extension of the tools available on the platform, as well as offering additional features such as trading alerts and gamification.

In the space of DeFi, NewsCrypto has developed a Stellar – Polygon token bridge, which allows anyone to swap their Stellar Lumens to Polygon, where they can make the most of Polygon's rapidly growing DeFi ecosystem. This, however, is only the first step, and NewsCrypto is also

developing its own DeFi protocol on Polygon.

In the near future, NewsCrypto will release a Copy Trading platform, where users will be able to automatically copy the trades of top professional traders. Unlike other similar platforms, the Copy Trading platform will allow users to trade on any major exchange by connecting their API, thus leveraging the exchanges' own security models, and it will also include a social-oriented aspect with content generated by both regular users and traders.

As a leading provider of financial information to members of the global crypto trading market, NewsCrypto is creating an ecosystem that will benefit both beginners and experienced traders. NewsCrypto is a self-sufficient, self-financing project that receives income from its business model, namely in the form of subscription payments.

The target market for NewsCrypto is the rapidly growing crypto sector, where the project's educational tools make it easier for anyone to start trading, as well as giving them all the info they need in order to navigate the sometimes perilous waters of crypto with confidence by employing proper security practices.

The heart of the NewsCrypto platform is the NWC token – a token originally built on the Stellar blockchain (currently also available on Ethereum, Binance Smart Chain and Polygon), that underpins all transactions for the NewsCrypto network.

The economy of the NewsCrypto platform has made the NWC token a multifunctional means of payment with a number of utilities within the ecosystem. The token provides ac-

cess to various premium features of the platform and app, as well as providing an opportunity for users to quickly grow their own personal brand within the ecosystem.

INTRODUCTION

BACKGROUND

The idea behind the project goes back to 2015, when the founding team members got involved in the cryptocurrency markets. Coming mostly from a background in traditional finance, they noticed the lack of trustworthy information in crypto, especially for market participants without extensive programming knowledge (who are thus unable to verify the vast majority of information on their own).

This idea came to fruition in October 2019, when NewsCrypto was founded. Unlike most projects, NewsCrypto opted not to have an ICO, with all the initial funding coming from the founding members themselves. Given the nature of the project, being self-funded was considered key for remaining unbiased.

Today, the NewsCrypto team consists of top traders, developers, various specialists and advisors that are being financially compensated entirely in the NWC token. This indicates that the project's success is directly correlated to the value that the platform provides to the community, thereby tying the team's incentives in with those of the community.

SOLUTIONS

As the problems facing new market participants span from information to the actual process of trading and using DeFi, the solutions are multifaceted as well, while being tied together in one comprehensive crypto ecosystem.

Firstly, it's important to educate new members to become a part of the crypto world. The NewsCrypto School program was put together by the most experienced crypto leaders in the industry covering everything that is vital to know. The whole section is designed to cater to everyone, from the very beginnings to expert knowledge, thereby preparing the community for real-life trading.

Secondly, the Copy Trading platform will make it possible for any market participant to profit from the expert knowledge of the world's top traders by automatically following their trades. As security is a prime concern in this process, this will be done solely by means of APIs (without withdrawal permissions), meaning that users' funds will always stay on their chosen exchange accounts.

Last but not least, the Stellar – Polygon bridge offers an innovative way for users to step into the world of DeFi. The bridge has two main target audiences: Stellar users that want to keep their XLM exposure while at the same time being able to make the

most of an Ethereum-compatible DeFi ecosystem with low fees; and experienced DeFi users that want to gain exposure to XLM without having to leave the blockchain environment that they're accustomed to.

MOBILE APPLICATION

A crucial part of the NewsCrypto ecosystem is the mobile app, which brings everything that both novices and experienced traders need in one convenient place. It includes a state-of-the-art market and portfolio tracking section, which enables users to fully customize the way in which the value of their favorite coins and their portfolio is shown (including the ability to show token and portfolio values in different fiat currencies).

While this section makes it a leading crypto tracking app on its own, the app's features go far beyond what is offered by any other crypto app out there. The app aims to create a comprehensive ecosystem that offers both education and entertainment. This is accomplished by means of

the Community Predictions section, where users can interact with the community and give their own opinion on the crypto markets.

The Community Predictions section also aims to directly crowd-source sentiment data by offering rewards for users' votes on bullish/bearish sentiment and predictions for specific cryptocurrencies. By posting correct predictions, users can earn more rewards and compete with others on the weekly leaderboards.

The app will also soon include all the essential trading tools and indicators available on the platform, as well as several app-exclusive tools (encompassing both alerts and important metrics on different segments of the market).

MOBILE WALLET

As security is a vital concern at NewsCrypto, the team has also developed a native mobile wallet app for the NWC token. This enables users to safely store, receive and send their NWC tokens right from their phones, without having to rely on third-party wallet providers or exchange wallets. The wallet is non-custodial, meaning that only the users have access to their private keys, making this the most secure method for holding and using NWC, which also boasts a modern, smooth and user-friendly interface. PIN, face ID and fingerprint authentication methods provide the ideal mix of convenience and security.

The wallet is designed to give all NWC token holders a way to easily view their token balance and transaction history, send, receive and hold tokens without relying on any other app. It also includes a price tracker that displays both the current price of NWC and the total value of the user's NWC balance.

PLATFORM

The NewsCrypto Platform is the nerve center for successful trading and investment decisions in the crypto world. It targets expert traders as well as the new generation getting into crypto trading. NewsCrypto solves the problem of finding the right information at the right time and guides investors from blindly investing in crypto assets. It serves as the first and most reliable source of knowledge and insight in the market.

The NewsCrypto Platform is divided into two separate tiers: Basic and Professional.

The Basic tier consists of essential tools and indicators available for free after registering an account, as well as all the educational content in the NewsCrypto Academy. The Professional tier, which can be unlocked with a subscription paid in the NWC token, includes more advanced proprietary tools and indicators.

This includes an Arbitrage tool, which displays the best arbitrage opportunities on all major exchanges, the AI Sentiment Analysis tool, which uses proprietary algorithms to predict the impact of online sentiment on the price of major cryptocurrencies, as well as the Pro version of the Moonlines tool that includes more data and more advanced automatic technical analysis charts. Apart from these tools, the Professional tier also gives users full access to the two different types of weekly reports: Market Price Reports, which provide an in-depth technical analysis study on a specific trading pair (along with an example of a complete trade setup), and Fundamental Analysis Reports, which sum up all the crucial info on a specific token or protocol in a concise and easily understandable form.

New indicators and tools are constantly added to both tiers of the platform, in accordance with the NewsCrypto roadmap, which is presented below.

Apart from educational sections and basic tools and indicators, the Community Predictions section is also available to all users for free, so that everyone can post their technical analysis content, interact with others and earn weekly rewards.

STELLAR – POLYGON BRIDGE

The Stellar – Polygon bridge allows anyone that holds XLM tokens on the native Stellar blockchain to bring them over to Polygon in the form of wrapped XLM (wXLM), where they can be traded and used in Polygon's rapidly growing DeFi ecosystem. These wXLM tokens represent XLM tokens at a 1:1 ratio and can always be redeemed back for native XLM through the bridge.

The bridge utilizes a variety of security mechanisms, such as different nodes that transmit the transaction data from one chain to the other and Chainlink's Proof of Reserve feature, which constantly tracks the token balances on the swap wallets with an independent node. In spite of this complex security mechanism, the interface itself is very simple, and transactions only take a matter of seconds to be confirmed.

NewsCrypto Coin - NWC

NWC tokens are the basis of the internal economic system of NewsCrypto and are used to access premium services implemented on the platform and (in the near future) to automatically copy the trades of professional traders on the NewsCrypto Copy Trading Platform. They serve as a special unit of account and are used to pay platform fees.

NWC tokens are a universal cryptocurrency that acts as a medium of circulation in the internal ecosystem of NewsCrypto and at the same time can be freely exchanged for fiat money and other cryptocurrencies.

When building the NewsCrypto economic model, the team opted for a deflationary model, which helps ensure stable demand and rewards early adopters. This means that NewsCrypto automatically burns 20% of NWC tokens received from membership fees. This process aligns the incentives of all the participants of the ecosystem, since an increase in the number of platform

users leads to increased deflation. Apart from this, there are also additional burn events carried out periodically in order to celebrate major milestones in the project's development.

NWC started out on the Stellar blockchain due to its very fast and cheap transactions. Eventually, the exponential growth of decentralized finance on other chains (particularly Ethereum and BSC) has created the need for NewsCrypto to go cross-chain and make the token available for use in these new protocols. Because of that, the team has implemented a version of NWC token on both Ethereum and BSC (with the Ethereum version also available on Polygon), making it possible for users to swap different versions of NWC with a single click. As this is done automatically via a smart contract, any user can swap between the tokens at a 1:1:1 ratio at any time and at no cost (except for the network transaction fee).

CONCLUSION

Cryptocurrency is a growing market that has started to receive an unparalleled level of public attention. This brings both unique opportunities and novel challenges to the crypto space, and NewsCrypto is uniquely placed to tackle these with its innovative approach to bringing everything that any trader or crypto user needs in one place. Covering every aspect of crypto from the basics of trading to on-chain activities, the project strives to become the go-to place for every trader and investor.

In conclusion, it's worth noting that NewsCrypto's vision has expanded significantly in the years since the project was founded, and this was

reflected in the additions to the project's roadmap, which expanded from a merely educational focus to encompass copy trading and DeFi as well – all that without diminishing the original mission of becoming the first and most reliable source of info for new market participants. To put it briefly: starting from education, NewsCrypto's vision expanded to adoption and beyond. Since these two aspects of crypto – spreading awareness and knowledge on the one hand and actual adoption in everyday life on the other – are mutually reinforcing, it is only appropriate that they should be interlinked in a productive way in NewsCrypto's mission as well.

ROADMAP

2018

**Core Idea Development
Market Research**

2019

**Concept Introduction
Minimum Viable Product Launch
First Exchange Listings
Platform Staking Launch**

2020

**Payment Integrations
Native Wallet Release
