## 3. A LOOK AT THE CHART:

Looking at the Bitcoin chart, since we managed to climb above MA50 we had a nice uptrend and reached a top at \$67k. Now the price is testing for support on the \$60,700 level. Breaking below it the price could drop to

\$57,400 where we predict to see a lot of buy pressure. If the sentiment stays as it is, we could see new highs sooner rather than later.
