Official Lightpaper

<https://www.newscrypto.io>

It is important to note that this is a summary and you should refer to the Whitepaper itself for more detailed information regarding our project.

Sincerely,

NWC TEAM

Who are we?

Newscrypto.io is a blockchain-linked ecosystem for all the information regarding cryptocurrency.

We present a platform appropriate for everyone seeking knowledge and trading advantages in the crypto world. With our non-ICO project, which was funded on our behalf we aim to be the GO - TO platform available for all types of crypto traders. We provide crucial information and educate our members about the financial world of crypto assets, with our unique trading tools, advanced indicators, community prediction section and our own school program.

Mission statement

We are aware of the situation that a lot of people are unfamiliar with cryptocurrency trading and lack of financial education. We sought a solution and came up with the Newscrypto.io platform which provides all the needed knowledge to our members so they can start or improve their trading career.

Our main focus is to solve the problem of finding the right information at the right time while being a trustworthy source and offer our members the best user experience possible.

Therefore, we strive to give our members security and confidence at the highest level while providing them the best indicators and analysis on the market. Newscrypto.io platform is fairly the most advanced project to date in regard to tackling the complexity and often life-essential challenges posed by today's global crypto market.

Vision

We aspire to give our users the EDGE in comparison to other traders.

Our vision is to get to the point where the name Newscrypto will come up to everyone thinking about cryptocurrency. We practically obligate ourselves to offer the best quality as we can regarding our platform and future planned projects. We see ourselves as one of the most influential projects that will take an important part in future crypto evolution.

Where are we headed?

Firstly, our goal is to help everyone who wants to know more about the crypto world. We aim to be the number one educational platform available. After we establish a strong healthy community we are going to focus on building the Newscrypto brand outside of the web. We plan to provide mentoring services through our own offices and build our own blockchain incubator. As we grow we would like to offer guidance and opportunity to every crypto entrepreneurial enthusiast out there.

Current problem

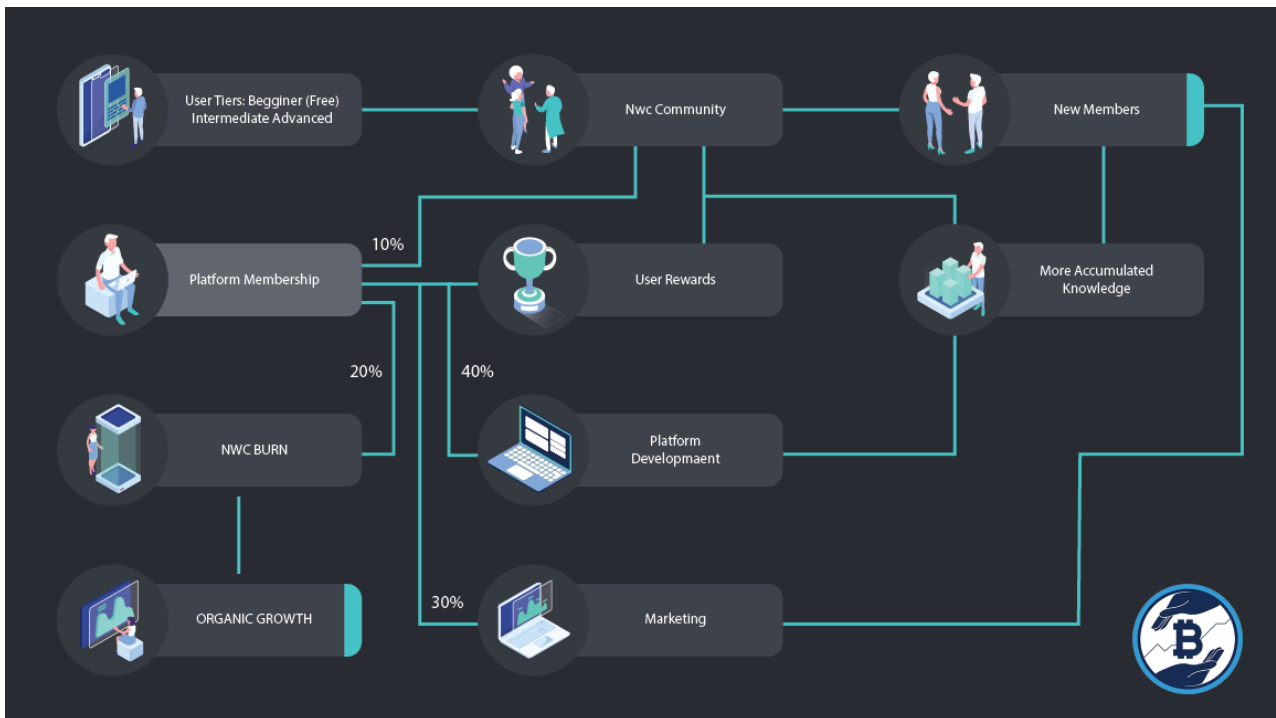

We are aware of the situation that many people are unfamiliar with cryptocurrency trading and probably had a bad experience with it, especially after January 2018. Most of them have never invested in any other asset or stock as they lack financial education to do so. Based on our research most people are still blindly investing, while big personas in crypto contain various information giving them better odds for a return. Beginners are influenced by the rumors and media outlet, but soon find out that it is not as simple as it seems.

Newscrypto School

We developed a school program suitable for beginners and those who want to expand their knowledge about trading with cryptocurrencies. For starters we have created 8 lessons which are divided into chapters, each chapter teaches you something new. At the end of each lesson, we have prepared interactive tasks. Each lesson has a text task in which you have to choose the right answer and tasks based on charts where you have to choose the right chart pattern.

Lessons grant you points if answered correctly. Upon finishing all tasks you get a title based on the points you have gathered through Newscrypto.io school. We have decided that we will reward you for your knowledge, meaning that for the amount of earned points, you can unlock intermediate and advance tiers for free on the platform

Ecosystem:

From Platform Membership fees 20% of the tokens are burned providing an organic growth for Newscrypto coin. 10% is intended for the community through different user rewards like weekly community prediction rewards and so on. 40% of the membership amount is meant for platform development so our platform grows, and we can provide more knowledge and market insights for our members. 30% goes into marketing to acquire new members and build our community which rounds the circle back to the organic growth of our token.

Token burning:

We offer a limited supply of tokens. The core of our future token development system is token burning. This means that we will automatically burn 20% of NWC tokens received from membership fees. The procedure of token burning reduces the total supply of our tokens which results in the organic growth of our value benefiting our investors and token holders. We aspire to be righteous to our community, therefore we obligate ourselves to burn as many tokens as we receive from memberships.

NWC Token:

The heart of the Newscrypto platform is the NWC token, a Stellar lumen compliant token that underpins all transactions for the Newscrypto network. It is the world's first data-payment bonded token. It is used to bind continuously updated and verified technical, environmental and fundamental data from the blockchain to its corresponding product as information for Newscrypto users. Our total supply of NWC tokens is 280.000.000.

The token is used to financially support employees, servers, maintenance and the platform itself. In the white paper, there are some insides and guides of our platform we have created for those who want to learn more about our project and for our potential future members.

Token public sale	50,00%	140000000
Retained by the company	32,09%	89852000
Community development	14,41%	40348000
Reserve funds	3,50%	9800000

User Tiers

There are three user tiers and each of them caters to a specific user type. The first one is for people with no or little knowledge about crypto trading. Intermediate level targets junior traders trying to take a step further and lastly advanced tier which is most suited for professional traders. Our given value grows by the user tier resulting in advanced tier having the strongest contribution to your knowledge and offers the best tools and most information. The beginner stage is completely free while Intermediate membership costs around 2 Euros per week and Advanced membership cost 5 Euros per week translated into NWC tokens at the crypto exchange rate.

Roadmap:

- Concept and Idea Creation 2018 Q2
- In-depth Market Research 2018 Q4
- Platform Designed 2019 Q1
- Crypto Community Engagement 2019 Q2
- Exchange listing 2019 Q4
- User Rewards 2020 Q1
- Platform Development Phase 2 2020 Q2
- Coming soon Tools 2020 Q2
- Smart notifications 2020 Q3
- Trading platform 2020 Q4
- Demo Trading 2021 Q1
- Platform App Release 2021 Q2
- Instant Trading platform 2021 Q3
