NEWSCRYPTO.IO Roadmap 2030 2022 2023 2024 2025 2026 2019-2021 2027 - 2028 2029 - 2030 2019 COMPLETED **CONCEPT INTRODUCTION** In 2018, after long and extensive research into the possible ways of addressing this problem, the NewsCrypto founders came up with the concept of a comprehensive educational platform, offering everything from simple explanations of basic concepts in crypto and trading to expert-level tools for experienced traders. COMPLETED NEWSCRYPTO PLATFORM MINIMUM VIABLE PRODUCT LAUNCH In 2019 Q3 we launched the first version of the NewsCrypto platform that served as the market test on what the crypto community needs. Unlike most projects, we decided not to raise money for the MVP launch via an ICO, opting instead to make the project driven solely by its utility to the community. COMPLETED NWC TOKEN FIRST EXCHANGE LISTINGS We created the NWC token as an internal unit of value in the NewsCrypto product ecosystem. In October of 2019, the NWC token got listed on the first CEX. We proceeded with adding new exchanges shortly after making our NWC accessible to as many people in crypto as possible. COMPLETED STAKING PLATFORM STAKING LAUNCH NWC staking option was launched on the NewsCrypto platform enabling users to maximize their holdings providing token lock rewards while unlocking NewsCrypto subscription for free. The NWC staking procedure is one of the simplest ones as holders can simply head over to the staking section on the NewsCrypto website and select the staking duration and desired amount. B NEWSCRYPTO NWC \$ 0.104664 \$ > ※ 本 STAKING Staking is the best way to maximize your holdings that are otherwise sitting in your wallet \$6,000 \$12,000 Airdrop Enter the amount you want to stake 110453 NWC max Select preferred staking plan: 12% 13254 NWC 2209 NWC +1 months FREE subscription SELECT 2020 COMPLETED **PAYMENT INTEGRATION** We added various payment options to expand the accessibility of our NWC token. Thus we implemented escrow services in collaboration with top payment providers, allowing a direct purchase option through our platform. This way we are making it even easier for beginners to get involved in the cryptocurrency space. COMPLETED MOBILE WALLET APP NATIVE WALLET RELEASE We launched our own native mobile wallet, allowing NWC holders to manage their assets from their mobile device. NewsCrypto seeks to ensure that NWC holders can safely store their assets, without having to rely on third-party exchange platforms for a wallet. This allows holders to maintain full control and have their tokens on the palm of their hands anytime. WELCOME 3170.00 NWC 10.0 NWC 4/21/2021 1.0 NWC 2.0 NWC COMPLETED NEWSCRYPTO APP **MOBILE APP RELEASE** We launched our NewsCrypto app designed to give users the power to track their portfolio, keep up to date on the crypto market, set smart alerts and interact with the NewsCrypto community on the go. We are implementing features inside the app to have a mobile ecosystem consisting of everything a crypto trader needs one click away. Like all NewsCrypto products, the new app is powered by the NWC token. B NEWSCRYPTO.IO AI SENTIMENT ANALYSIS MARKETS AND FAVORITES YESTERDAY'S PRICE TODAY'S PRICE COMPLETED **DEX LISTING** With the growth of decentralized exchanges, we added the option to purchase NWC tokens there by creating pools and providing liquidity. Alongside our crosschain development this brings a number of advantages to NewsCrypto users, the most significant being the ability to hold NWC in their Ethereum or BSC wallets and to send the token to any Ethereum or BSC address. COMPLETED **CROSSCHAIN IMPLEMENTATION** Because different blockchains offer different capabilities, the project decided to enable a cross-chain swap in order to facilitate the adoption of NWC in DeFi protocols and decentralized exchanges, as well as making it available to a wider user base. NWC started out on the Stellar blockchain due to its very fast and cheap transactions. Eventually, the exponential growth of decentralized finance on other chains (particularly Ethereum and BSC) has created the need for NewsCrypto to implement a version of NWC token on both Ethereum and BSC, making it possible for users to swap between these protocols. COMPLETED AMBASSADOR PROGRAM We are launching the ambassador program to create an international team of NewsCrypto representatives who will cover the whole globe and help the project and crypto space, in general, take a leap forward. Our mission with the ambassador program is to drive global awareness, provide crypto education and expand our team around the world and thus accelerate the growth of the NewsCrypto company. With the ambassadors we will be able to build more global communities and expand the reach of NewsCrypto. 2021 COMPLETED UNCHAINED EDUCATION **EDUCATIONAL HUB LAUNCH** We launched Unchained Education, an educational hub that expands the way that we provide content to our users. The hub enables anyone with the required skills to create and monetize their own content by publishing on their own section of the hub and setting up one-on-one sessions with students. ☀ 🕱 B NEWSCRYPTO ⑤ NWC \$ 0.104913 \$ > PREMIUM CONTENT DESCRIPTION Profitable Price Market Price Reports Ratio: How to Trading by Yvan Strategies by Optimise your investments By Crypto Monk like to share and monetize your knowledge on any topic that you're passionate about, you'll soon be able to **RATIO** 07.07.2022 05.05.2022 8 SpelaLuk Professiona COMPLETED AI SENTIMENT TOOL AI SENTIMENT PRICE PREDICTION We released a proprietary AI-based sentiment analysis tool, which analyzes all available data (including but not limited to social media) to determine sentiment scores and then creates price predictions based on these data. The algorithm also continually adapts to new data, making it the most accurate tool of its kind by far. (a) NWC \$ 0.104913 \$ > B NEWSCRYPTO TOOL DESCRIPTION AI SENTIMENT ANALYSIS SpelaLuk Professiona COMPLETED TRADING ALERTS TRADING ALERTS SETUP We created a wide selection of customizable alerts that help users keep track of the market and find trade setups without needing to spend too much time looking at charts. The alerts go far beyond simple price alerts, with alerts based on indicators, as well as gas fee alerts, to help users time their transactions so that they pay the lowest fees possible. 2022 COMPLETED MERCURY TRADE MERCURY TRADE DEVELOPMENT AND BETA LAUNCH Sometimes the best strategy is to follow what the best players in the game are doing, which is why we were hard at work on developing the next-generation copy trading platform, Mercury Trade. Users will be able to see a list of the most successful traders and their PnL, and they will then be able to automatically copy the trades that they make. Most importantly, this process will work through API keys, meaning that users can keep their funds in their exchange accounts. COMPLETED AI TECHNICAL ANALYSIS Following up on the AI sentiment analysis tool, the next step will be developing a proprietary AI algorithm for technical analysis. The algorithm will be able to recognize different TA setups, such as patterns, indicator-based strategies and more. Then, it will select the best-performing strategy based on extensive backtesting data and provide live information on the best setups across the whole crypto market, giving users a valuable edge and saving time spent on scanning charts. COMPLETED LIVE TRADING SESSIONS Trading and technical analysis are areas that we've always been passionate about, which is why we'll expand our offer with live trading and analysis sessions. Our team members, advisors and other TA experts will analyze charts in real time and answer questions from viewers, giving them both up-to-date TA as well as valuable experience on how they can improve their own analysis skills. COMPLETED ADVANCED MONEY FLOW TRACKER One of the most important things for any is to know where and how capital is moving around in the world of crypto, and our advanced money flow tracker provides just that. It has exchange inflow and outflow tracking for stablecoins and major cryptocurrencies, but it will also monitor the ratios between large, mid and small-cap tokens in order to give users up-to-date info on market cycles and phases of capital flow in crypto. COMPLETED **NEWSCRYPTOVERSE DEVELOPMENT** We're working on the NewsCryptoVerse, our own metaverse which will be focused on education and trading. Users will be able to set up their own virtual offices with personalized trading tools, display their bling in the form of NFTs, as well as awards and certificates earned through our various educational and other projects. 2023 MERCURY TRADE COMPLETED **MERCURY TRADE FULL LAUNCH** After extensive development, testing and fine-tuning, we released v1 of Mercury Trade, featuring a fully revamped UI and upgraded copy trading functionalities, including new exchange integrations, order types, leaderboards and more. Our aim throughout has been to optimize both user experience and security. mercury trade Copy expert crypto traders in real-time Mercury Trade is the simplest tool created for autocopying trades. Find a trader, autocopy them, increase passive income. COMPLETED **EDUCATIONAL PROGRAM EXPANSION** We've always focused on providing education online, but since many people prefer the impressiveness of live, in-person teaching, we will also provide offline courses that will be taught by our team members and advisors in collaboration with different educational institutions. This will also help with adoption, as we will reach students that would otherwise not be interested in learning about crypto online. On the online side of things, we will expand the NewsCrypto Academy with all-new sections. COMPLETED THE BIGGEST CRYPTO NETWORKING SPACE Given that crypto is such a unique space in terms of the requirements and job opportunities, we're convinced that the best way to meet the demands of both projects and professionals is to create a crypto-specific networking space that would bring together everyone in crypto in one user-centric place. This will happen both online and, at a later stage, in the form of offline events. **BLOCKCHAIN INCUBATOR** Starting a project in crypto can be daunting, and we are very familiar with all the challenges that crypto startups face in the early phases of development. That's why we'll set up a Blockchain Incubator that will enable projects to receive both technical and material assistance to help them get off the ground. Bringing valuable projects into the space and enabling them to reach their target audience is something that will benefit all of us, and it's something that we should all work for together. PROGRESSIVE DECENTRALIZATION 2024 We will continue working on making the project as decentralized and community-governed as possible, which means that the scope of governance decisions will also be greatly expanded to include all the key decisions on the project. The existing team will continue suggesting proposals and working to implement them, but the decision-making will always come from governance. NewsCrypto is a project built by traders for traders, and this will be implemented to the fullest extent possible. **SOON TO BE REVEALED** We are going to implement a host of new financial products that will be available to all token holders, as well as a different and completely new protocol that is yet to be made public. **PAYMENT SYSTEM 2.0 INTEGRATION** We will continue to improve our financial products with completely new functionalities which will bridge the gap between the worlds of crypto and fiat. Much of this is still open-ended, as the new features will be decided on in large part by the community through the governance function of the token. **GAMING AND METAVERSE** Our development in the realm of metaverse and GameFi will be made public with a completely new product, one that will combine token utility with jaw-dropping graphics and more. **CROSS-CHAIN GOVERNANCE** The core focus of our project has always been our community, and that is why we will put decisions on our future development in the hands of all token holders by implementing an improved governance function for the NWC token on-chain. Users will be able to vote from their wallets on any chain, whether they hold ERC20/BEP20 NWC on MetaMask or Stellar-based NWC e.g. on Solar or a different Stellar wallet. This will make governance even more transparent and easier to participate in, without any logins, contact data etc., but just a self-custodial wallet. **EXPANSION OF THE NATIVE WALLET** Our native NWC wallet has proven to be popular among our users, but it has so far been limited to the NWC token on its native Stellar blockchain. That's why we aim to expand the wallet by enabling users to also hold NWC on other chains (Ethereum and BSC) as well as other tokens, including primarily the top cryptocurrencies by market cap. **NEW & IMPROVED AI-BASED TOOLS** Apart from sentiment analysis and TA, we will continue working on unleashing the power of AI in every possible sector of the crypto market. Whether it's analyzing on-chain flows, NFT floors and price statistics, derivatives data or anything else, we'll have all the key data points covered with our proprietary indicators. These indicators will be customizable, meaning that only you will have access to your own alpha, powered by Al. **NEW STRATEGIC PARTNERSHIPS** Several of the developments mentioned above have been conceptualized together with top-tier professionals and projects from across the crypto space - and some from completely different areas of tech. Some of these partnerships will be announced much sooner, but others are at very early stages and will take shape in new long-term products and collaborations over longer time frames. 2025 MERCURY TRADE EXPANSION With current trends in TradFi heading more and more towards bringing legacy markets in line with crypto (from risk management to derivatives products), we aim to expand Mercury Trade into the sphere of equities, commodities and forex trading. **COMPLETELY NEW EDUCATIONAL PROGRAM** Education was the area in which NewsCrypto started, but in spite of all the ways that we branched out through the years, it remains a core focus of what we do. In line with this, we will continue improving the educational content that we provide and making it available through completely new ways. \bigcirc SBTs (SOULBOUND TOKENS) We believe that SBTs (Soulbound Tokens) will play an increasingly crucial role in Web3, which is why we are already talking to various institutions and projects in order to develop new ways of pursuing this avenue in Web3. Some implementations, as upgrades to existing services, will be launched soon, but we're also working on something much broader. 2026 **ADOPTION AND REAL-LIFE OUTREACH** In spite of the exponential growth of communications technology, a crucial part of getting those who need crypto the most to take the leap and start using it is still in the "real-life" world. We are tackling this with a comprehensive strategy involving payment systems, educational programs and much, much more. \bigcirc PEER TO PEER EXCHANGE It's unfortunately very likely that, even years from now, there will be countries where access to traditional crypto exchanges will be severely limited. This is why we will enable all crypto enthusiasts to trade peer-to-peer, giving them the freedom to take their financial future into their own hands. \circ SOCIAL MEDIA FEATURES ON THE NEWSCRYPTO PLATFORM Apart from being the go-to access point and educational resource in crypto, we'll continue expanding the ways that users can interact, monetize their knowledge and grow their personal brand right on the NewsCrypto platform. **PHYSICAL EXCHANGE OFFICES** 2027-2028 We want to make crypto adoption as simple as stopping by the grocery store, which is why we're planning to bring physical exchange offices, where crypto can be traded for fiat currency, to places where traditional, bank-based access to crypto will be impractical. **PREDICTION MARKETS** Trading crypto is one thing, but we aim to enable everyone to monetize their expertise by predicting outcomes in anything from geopolitical analysis to science. \bigcirc **NEW INFORMATIONAL TOOLS** 2029-2030 Technology may change, but the need to always be informed in the markets will always be there. Our informational tools, moving from news aggregators to customizable feeds based on proprietary algorithms, will reflect that. \bigcirc **TBA** More is to come - as crypto continues to evolve, we will continue to grow with it, based largely on decisions made by governance.
