Abstract

NewsCrypto is a global provider of the latest information and analytics on the current state and the near future trends of major crypto markets.

One of the key services of NewsCrypto is the terminal, which is an integrated platform that combines data on the cryptocurrency market, quotes, general news, and trading operations.

NewsCrypto develops its ecosystem, which includes professional analysis tools in the field of crypto trading, Crypto Community Engagement, Payment System, Advertisement Service, and the NewsCrypto School.

The platform is actively developing. The work is underway to bring to the market such powerful tools as Crypto Sentiment Indicator, NewsCrypto price alerts, Private chat integration, NewsCrypto trading bot, and AI price prediction.

In the near future, NewsCrypto will provide users with access to such services as Shadow trading, Messenger price alerts, and NewsCrypto Blockchain incubator.

As a leading provider of financial information to members of the global crypto trading market, NewsCrypto is creating a platform that will benefit both beginners and experienced traders.

NewsCrypto is a self-sufficient, self-financing project that receives income from its business model.

The NewsCrypto platform is a high-quality service that relies on its infrastructure and actively forms a loyal community and a structured ecosystem.

The target market for NewsCrypto is a stable and constantly growing cryptocurrency trading market. This allows you to develop your project and grow your user base exponentially.

The heart of the NewsCrypto platform is the NWC token - a Stellar Lumen compliant token that underpins all transactions for the NewsCrypto network.

The economy of the NewsCrypto platform has made the NWC token a multifunctional means of payment, remuneration, and accumulation. The token provides access to the system's payouts, bonuses, and it provides an opportunity to quickly develop an internal ecosystem.

With a significant increase in demand and limited supply, NWC has become one of the most attractive tokens for investing with guaranteed stable organic growth.

Additionally, NewsCrypto automatically eliminates 20% of the membership fees, which allows you to guarantee the growth of the rate with the increasing project's user base.

Mission

The mission of the Newscrypto project is to develop a new global analytical ecosystem that creates a simple and efficient financial environment for successful cryptocurrency trading.

Trading cryptocurrencies in the financial markets, despite impressive profitability, is becoming increasingly difficult. The only way to be successful in this area is to get hold of a powerful information tool that will allow you to trade more efficiently.

Newscrypto solves the problem of finding and analyzing the right information at the right time and allows users to make rational investment decisions.

By opting for NewsCrypto, you get a chance to join the cryptocurrency trading world and gain access to a platform that brings together the present and future of crypto markets.

Introduction

Project Background

Newscrypto.io the best place in the crypto world for money-making decisions.

Unlike most newly developed crypto projects, the Newscrypto platform is an already tested product used by the world's top traders. The concept of the platform goes back to 2015 when the founding team got involved in crypto trading. Spotting deficiencies in the crypto trading industry and lack of reliable market information sparked development of the structure and ecosystem that would disrupt the cryptocurrency trading industry forever. In October of 2019, the idea became reality.

Newscrypto is a non-ICO entity. Contrary to the majority of new projects, Newscrypto did not collect ridiculously high soft cap or seek any external equity funding. Everything is self-funded as the project is going straight to the market proving that it's here to stay in the long run.

The Newscrypto team now consists of world top traders and advisors that are being financially compensated entirely in the form of our NWC token. This indicates that the project's success is directly correlated to the value that the platform provides to the community thereby making the team even more motivated to deliver the best possible results every day.

Project Specification

The Newscrypto platform is divided into three distinct levels which are split as Beginner Tier, Intermediate Tier, and Advanced Tier.

The Beginner tier consists of essential tools and indicators available for free after registering an account. The other two tiers can be unlocked with the NWC token. Every user has to pay a monthly or yearly fee corresponding with the level of access required respectively to the tools and indicators programmed in-house by the Newscrypto Technology team. School lessons are completely free for everyone as it is in our interest to educate people about the world of crypto to expand and increase the potential base of new crypto personas. The community prediction section is devoted to speculative traders to post their market predictions and even earn weekly rewards in the form of NWC tokens.

The Newscrypto platform grants access to the most advanced price analysis reports and premium alerts as the platform evolves. The NWC token utility is synergistically linked to the platform.

The NWC team is seized with delivering the project's plans to reality and these extend outside of the platform as the team plans to open virtual offices providing live lessons on crypto trading. Furthermore, it is within the company's roadmap to launch an incubator allowing Newscrypto members to start their blockchain projects while Newscrypto will provide all the needed support around it.

System Architecture

The Newscrypto platform is built to support high data loads and reads from blockchain network participants with exact rules which data to extract. The platform's architecture updates within milliseconds in different environments, even those outside of the blockchain core focus.

Although a single piece of data is typically less than 100 bytes, the system is designed to collect potentially thousands of measurements per batch. Since a batch may include data from multiple sources, the platform will need to handle terabytes of data daily. To achieve this platform capacity, Newscrypto has created a custom software that integrates with the blockchain and a distributed storage system.

Challenges

Cryptocurrencies are spreading like no other financial instrument at this moment. Countless people are intrigued to buy crypto assets but they face two main setbacks making them anxious to do so.

Crypto is perceived as a financially unstable space, the fluctuations in the market make people fear that they will lose their value.

Most prospective investors do not know how or where to buy cryptocurrencies as they lack what seems to be basic knowledge.

There is also a huge growth in internet sites containing manipulated information which may end up misleading to investors and traders. Compounded by market fears mostly

stemming from the highly publicized horrific crash of January 2018, people's confidence in cryptocurrencies has continued to fall resulting in traditional financial services being overly expensive beyond the reach of many people due to risk factors.

There are a lot of inconveniences with the currently existing crypto exchanges which are quite hard to understand without proper guidance, especially charts which are a crucial tool in trading. This is why people end up blindly investing and having to rely on pure luck to save them. It is a sad case similar to the proverbial small fish swimming in a pool full of sharks.

Solution

NewsCrypto.io is the most advanced crypto-orientated platform to date consisting of everything a trader needs; information, knowledge, and confidence all in one. The platform was created for those who want to master the cryptocurrency markets and reach new financial heights.

Specially programmed indicators at NewsCrypto recognize any unstable market reactions and display the trends so there are no unexpected occurrences. The platform monitors real money deposits and withdrawals at all major fiat gateways, big money movements on the exchanges to control the whale's actions, and much more.

Firstly, it's important to educate new members to become a part of the crypto world. The NewsCrypto School program was put together by the most experienced crypto leaders in the industry covering everything that is vital to know. The whole section is designed to cater to everyone, from the very beginnings to expert knowledge thereby preparing the community for real-life trading.

The scope of NewsCrypto's content and information is wider than any other platform available today. With a cheaper price range for any payment plan users choose, NewsCrypto is financially accessible for everyone.

Platform

Trading Indicators and Tool

News crypto platform is the nerve center for money-making decisions in the crypto world. It targets expert traders as well as the new generation getting into crypto trading. News crypto solves the problem of finding the right information at the right time and guides investors from blindly investing in crypto assets. It serves as the first and most reliable source of knowledge and insight in the market.

The platform provides data on buy and sell orders, best exchange rates, gives detailed information about smart money movements, displays fundamental and technical analysis and deep market insight on price movements. The platform works for you, saving time and energy in every aspect of the crypto world by having crucial insights in the palm of your hand.

News crypto trading section platform is divided into three major tiers: Beginner, Intermediate, and Advanced and each of them caters for a specific user type.

The Beginner Tier is accessible after registering an account. It consists of essential tools and features every crypto trader needs: from specially filtered breaking news, charts, currency watchlist, portfolio manager, performance indicator, and other Bitcoin-oriented indicators.

The Intermediate Tier comprises next-level features with detailed market insight. Users can take advantage of price differences between several markets listing the same coin with the arbitrage feature. Other features include sentiment, stock to flow model, trading indicators like genesis, bitcoin to gold comparisons, relative strength indexes,

trading options and many more. The features in this tier allow users to make a step towards more professional trading.

The Advanced Tier unlocks the most advanced programmed indicators to get an edge over other traders in the crypto trading world. You can track every big amount transaction in the market with whale alert, analyze the correlation between assets, see how much FIAT is flowing in and out on crypto exchanges, deep Bitcoin cycle analysis, historical price movements frames, Bitcoin relative changes and so on. This “package” of indicators allows you full access and control of all the action in the world of crypto.

New indicators and tools are constantly added to the spectre of the provided features. The project’s roadmap indicates a complete range of necessary features that will continue to be unveiled.

News crypto School

News crypto.io has developed a school program suitable for beginners and those who want to expand their knowledge about trading with cryptocurrencies. The school program, designed by the world’s best traders and crypto minds is completely free as it is in the project mission to educate as many people as possible to make crypto trading accepted by the masses. The educational program was designed to provide users with a powerful theoretical and practical experience and warn them about possible mistakes in the crypto world.

The school program is divided into different groups which cover the Basics, Charts, Trading strategies, Economics, Crypto development, Everything about Newscrypto tools. In each group, there are lessons divided into chapters, at the end of each lesson, there are prepared interactive tasks. Each lesson has a text task in which you have to choose the right answer, tasks are based on charts where you have to choose the right chart pattern.

These lessons grant you points if you answer questions correctly and move you forward on the platform progress bar. Upon finishing all lessons and tasks, you get a title based on the points you would have gathered through Newscrypto school. Newscrypto will incentivize users and members for their knowledge and skill displayed while learning, this effectively means that they will get advanced membership unlocked free of charge upon completing their tasks.

Community Predictions

In the world of cryptocurrency, information is power. The Newscrypto community prediction section is created for members to interact with each other and view the predictions that other crypto traders make. Live chat is implemented in the section which effectively serves as a mini social media. We collect predictive charts from the most experienced traders to those who are just starting. With the like mechanism, you can sort and choose the best ones. There is also a play option, that shows how your prediction is doing in the current situation, thereby presenting a great opportunity to test and improve your charting skills.

Newscrypto community predictions are also a great way to earn NWC tokens. Each week there is a distribution of NWC tokens to the top three contributors on the site. By rewarding

members, the section is alluring for world top traders making the content even better. With regular posts, Newscrypto users can have a real-time overview of the market.

Predefined Charts

Charts are one of the most important tools for crypto traders. Newscrypto has a wide selection of charts with a variety of options for members to use. They are not only used to track the price movement for a particular coin but also to compare Bitcoin with any currency in a particular period of time.

The Newscrypto team took a step further and developed predefined charts which are regularly updated. There are more than eight pairs with support and resistance lines already drawn on the chart with trend lines systematically added by the team. These charts are professionally drawn by the world's top traders but are fully customizable so you can also draw on them and move things around. The lines plotted on these charts have an extensive history value and have been extensively market-tested. The asset movements prove that Newscrypto predefined charts are one of the most reliable sources of insight in crypto.

Market

NewsCrypto operates in the global and most successful sectors of the blockchain market. Cryptocurrency trading is a huge, steadily growing market.

The latest major research project conducted by Chappuis Halder & Co. showed that there were about 43 million active crypto traders worldwide at the beginning of 2020. This figure

shows a significant market growth when the number is compared to the one from a study conducted by the Cambridge research paper a year earlier. Back then the market had approximately 35 million active crypto traders.

The distribution of traders by the geographical location is shown in the image below:

Active Crypto Traders Across The Globe

Source: chappuishalder.com

According to cryptocompare.com, the total monthly volume of transactions in the field of crypto trading in July 2020 has exceeded \$550 billion, of which \$334 billion came from the Top-Tier exchanges.

Historical Monthly Top-Tier vs Lower-Tier Volume

Source: cryptocompare.com

Given the historical growth of the market volume and the undeniable profitability of the cryptocurrency market, it should be noted that today the main beneficiaries are professional traders who have sufficient information resources to quickly conduct transactions and other hired personnel who can manually select and analyze information around the clock.

However, even the fastest, most attentive, and hardworking employees cannot operate with the efficiency of the automated tools that Newscrypto offers. The simple interface allows even beginners to use the platform. As a result, they can trade more efficiently than experienced traders.

The Newscrypto rollout test was conducted with 10,000 users to help to improve the platform's ability to provide seamless services to a large

number of users. By getting real feedback the team was able to design the platform appropriately to meet as many trader's needs as possible. The main conclusion was that this product is needed, desired, and beneficial for crypto traders. On average their trading results got better as compared to the ones received before they used the Newscrypto platform, showing the added value.

No doubt that this scenario makes Newscrypto a true quality standard in this field and allows it to control a significant share of the existing cryptocurrency trading market.

Newscrypto Coin – NWC

The Economic Model

Newscrypto's economic model is based on selling access to high-quality service which is similar to the economic model of a traditional IT company.

Newscrypto has transparent sources of revenue, which have already been tested in the blockchain market. The project relies on proprietary technologies and an operating platform, which is a tool that generates profit for registered users.

The economic model of Newscrypto is based on the long-term planning of activities and a well-structured business approach to the consistent development of the service.

This allows generating cash flows and quickly scaling the platform, increasing the company's market share.

An additional stabilizing factor is that Newscrypto operates in the largest and most successful sector of the blockchain market. Cryptocurrency trading is a huge and relatively predictable market with thousands of people entering the market everyday.

This market is huge indeed and the growth potential of Newscrypto is unlimited.

NewsCrypto Mechanism

NWC tokens are the basis of the internal economic system of Newscrypto and are the equivalent of all services implemented on the platform. They serve as a special unit of account and are used to pay platform fees.

By purchasing NWC tokens, the user gets access to the functionality of the Newscrypto platform and highly liquid instruments with increasing value.

NWC tokens are a universal cryptocurrency that acts as a medium of circulation in the internal ecosystem of Newscrypto and at the same time can be freely exchanged for fiat money and other cryptocurrencies.

Users can buy and sell NWC tokens, while the value of the token remains connected to the supply and demand on the open market.

When building the Newscrypto economic model, a deflationary model for regulating the token rate is applied, which allows ensuring stable demand and balance the internal processes of the platform.

The internal circulation system was balanced based on the monetary exchange equation:

$$M_{\text{CNWC}} * V = P * Q,$$

where M_{CNWC} — NWC Market Cap (Current NWC Rate * Circulating Supply),

V — token circulation speed,

P — commissions for key platform services,

Q — a cumulative volume of transactions on the Newscrypto platform.

Factors that allow you to maintain a stable organic growth of the token rate:

1. Payment of commissions for the services of the Newscrypto platform and purchase of access to partner services is carried out in tokens only. The growing demand for NWC tokens with an increase in the number of users, commission rates, and the introduction of additional products increases the number and volume of transactions. Therefore, it leads to an increase in the current rate while maintaining the internal circulation speed.
2. The rise in the value of the NWC token is additionally ensured by the elimination of 20% of the tokens that the platform receives in the form of commissions. This reduces the total volume of tokens in circulation, stimulates the growth of the exchange rate, and allows increasing the loyalty of the NWC community and holders.
3. The introduction of additional services and the attraction of partners to the Newscrypto ecosystem will also ensure the organic growth of the platform's capitalization by expanding the circulation of the token.

According to the research, the number of paid Newscrypto members will be around 15,000 in the first year after the start of active investments, 50,000 in the second year, 120,000 in the third year. The number will continue increasing in the upcoming years.

The number of active registered users that formed the Newscrypto community at the beginning of 2020 will increase from 110,000 to 880,000 by the beginning of 2023.

This will be achieved by implementing an active investment strategy and adding such

services as Crypto Sentiment Indicator, Newscrypto price alerts, Private chat integration, Newscrypto trading bot, AI price prediction, Shadow trading, Messenger price alerts, and Newscrypto Blockchain incubator.

In the future, NWC will also serve as the access key to different plugins and will be implemented as an internal token for selected blockchain startups and crypto-trade projects, expanding the scope of implementation and increasing demand.

Token Mechanism

Newscrypto Token - NWC

The NWC token is an internal unit of value that the Newscrypto platform created to manage its business model. Newscrypto offers its users to interact with the terminal and try out its services.

The success of the Newscrypto platform is measured by the members and community in the form of positive movements in the price of the NWC token.

Token name: Newscrypto Coin

Symbol: NWC

Total supply: started at 280.000.000 which is being reduced due to automatic token burning (more on this in the ecosystem)

Token Allocation		
Token public sale	50,00%	140000000
Retained by the company	32,09%	89852000
Community development	14,41%	40348000
Reserve funds	3,50%	9800000

Token Public Sale		
Development	50%	70000000
Research	30%	42000000
Operations	15%	21000000
Legal	5%	7000000

Retained by the Company		
Founders	83,47%	75000000
Team / Advisors	16,53%	14852000

Community Development		
Bounty	21%	8473080
Ambassadors	73%	29454040
Other	6%	2420880

Token Burning

News crypto offers a limited supply of tokens. The core of the token development system is token burning.

This means that News crypto will automatically burn/ permanently remove 20% of NWC tokens received from membership fees. This process of token burning reduces the total supply of NWC tokens which results in the organic growth of the token value and in the process benefiting investors and token holders.

News crypto is committed to the continued provision of a transparent and beneficial service to the community, because of that,

the team is obliged to burn as many tokens as received from memberships. Any kind of token abuse and token manipulation is strictly forbidden and inconsistent with the project’s mission.

When the goal of 1 million members is reached, the company will dispose of all remaining tokens if any. The total supply of tokens is 280.000.000 and the estimated circulating supply in 5 years is 90.000.000. With the process of burning NWC tokens, News crypto keeps the demand and price of the tokens as high as possible.

NWC Token Functions

NWC Purpose	Goal	Function
Built-in-rights	Increased engagement and audience expansion	<ol style="list-style-type: none"> 1. NWC token as a project services provider. Members will have to pay a monthly, or yearly membership fee to access the Intermediate and the Advanced tiers for tools and information provided on the News crypto platform. 2. Token as a platform management tool. The volume of tokens held can be taken into account when carrying out an internal vote session for identifying further development directions or/and the introduction of new products. 3. Token as an incentive tool. All incentive payments and user rewards will be made in NWC tokens. 4. The token does not provide ownership of the product, operational management rights, or platform's profit claim.

NWC Purpose	Goal	Function
The structural element of the circulation system	Economy creation	<ol style="list-style-type: none"> 1. Token as a measure of value. Prices for all products and services, rewards, and payouts are indicated in NWC tokens. 2. Token as a payment and exchange tool. Token acts as a means of payment for any transactions within the platform. To provide this function, it must have high liquidity and instantly exchange for any other cryptocurrency and (in the future) fiat currencies directly in the built-in Newscrypto Wallet. 3. The function of saving and investing. To implement this function, the project team maintains a stable organic growth of the NWC rate. The success of the Newscrypto platform is measured by the members and community in the form of the positive movements in the price of the NWC token.
Funding instrument	Funding for the development of the Newscrypto platform	<ol style="list-style-type: none"> 1. Raising funding through the implementation of the initial emission of NWC tokens.
Management tool	Stabilization of platform development	<ol style="list-style-type: none"> 1. The payment of bonuses and incentives for actions aimed at developing the platform (promotion, development, representation). Everyone behind the platform, namely the team, will receive their financial compensation entirely in Newscrypto tokens. This means that it is in the team's best interest to provide a quality user experience and maximize the value of the NWC token as the team's compensation is interlinked to the success of the platform. 2. Impact on the rate due to the sale/ purchase on the open market.

Stellar Blockchain

The Newscrypto coin is a Stellar Lumen compliant token. Stellar is a decentralized payment network that allows a cross-asset value transfer by using a distributed ledger on the blockchain. It is primarily a platform that connects banks, payments, systems, and people. With its core, you are able to move money quickly, reliably, and at almost no cost.

The Stellar blockchain has also gone a step further to ensure security implementing

various authentication constraints and encryptions. The average settlement time for the Stellar transaction is 5 seconds. This gives Stellar a tremendous advantage over other alternatives. The transaction fee on the Stellar network is considerably small. An approximation states that for the fee to total 1XLM, it would have to contain 100,000 transactions. Furthermore, it is also very fast as it can process 3000+ transactions per second.

Advantages

Reasons and factors that allow Newscrypto to dynamically develop and scale on complex markets:

1. The platform brings money to its users. Today Newscrypto is a market-proven high-tech terminal with powerful analytical tools. By offering a better service at a lower price, with free access to basic tools and an educational program, Newscrypto has built a community of more than 110,000 registered traders.
2. The platform operates on the only blockchain market that is consistently bringing profit. The crypto trading market is huge, and the growth potential is unlimited.
3. Newscrypto has built a working business model and a transparent mechanism for increasing the value of the NWC token. The main indicator of the effectiveness of Newscrypto is the stable organic growth of the NWC token.
4. Newscrypto has completely transparent revenue streams that make it independent of external funding. The project does not collect money from its users but rather relies on the development on its own income, which allows it to quickly scale the platform, increasing its market share.
5. A self-made project. The project relies exclusively on its development strategies. Newscrypto technologies allow creating tools that generate income for users.
6. A project with a transparent and relatable success story. Newscrypto has been on the market since the beginning of the massive adoption of blockchain technology. During all this time, it has been consistently improving and building up its user base.
7. The project is recommended by independent experts. Some of the reputable expert platforms objectively highlight the trust lines, experience, and the ecosystem of the Newscrypto platform.
8. Active investment as a program strategy. The main goal of the active investment is to achieve rapid growth in Newscrypto's market share and create a structure that can significantly influence the market in order to obtain the most favorable conditions for traders.
9. A rapid transition of the project to a new level. The cumulative effect caused by the introduction of new services and the expansion of the user base allowed Newscrypto to enter the stage of exponential growth.
10. Stable growth of the NWC's value. The main task of the Newscrypto team is to make sure that the NWC token increases in value every day. Until now, they have been able to achieve this goal.

Future Development

Along with the Newscrypto platform, the plan involves virtual offices where Newscrypto team will provide live lessons with top crypto advisors and professionals. This service will assist anyone to learn more about crypto and provide an upper hand to anyone who wants to take the step further and start their journey in cryptocurrency entrepreneurship.

Newscrypto will establish an incubator which will serve the community as an opportunity to start their blockchain projects whilst getting all

the support needed. The Newscrypto team will provide the development expertise, marketing help and all the know-how needed to create a successful project. Having a physical presence will make the reaction times much faster and improve communication. The team's focus is to build the most innovative incubator to date and enlarge the Newscrypto community through successful business alliances.

Conclusion

Cryptocurrency is gaining market and public attention like no other financial instrument at the moment. Many players will try to take advantage of the investment opportunities in the industry as it is projected to erupt in the future. One thing that is for sure, Newscrypto is and will be the best place in the crypto world for money-making decisions. The Newscrypto project is built for the long run with an innovative roadmap with realistic and global changing goals.

Newscrypto proved that it can support and offer everything traders need to make profits; the number of members is expected to surge. Covering every aspect of crypto, the platform strives to become the go-to place for every traders and investor.

Newscrypto is defying the prevailing negative misconceptions that cryptocurrencies aren't a safe investment. Newscrypto platform solves the problem of finding trustworthy information, tools and insights by offering members the best user experience possible in the world of crypto trading. The company positions itself to become the Google of cryptocurrency, shaping the industry in the right way.

With practical approach to the market, it is inevitable that the NWC token will become the mainstream cryptocurrency.

Newscrypto is here to shape the future of crypto trading.
Let's do it together.

Roadmap

- ✓ Q2/2018 Concept Launch
- ✓ Q4/2018 In-depth Market Research 2018
- ✓ Q1/2019 MVP Launch
- ✓ Q2/2019 Crypto Community Engagement
- ✓ Q4/2019 Exchange Listing
- ✓ Q1/2020 User Rewards System. New platform tools and indicators release
- ✓ Q2/2020 FIAT payment system widget for NWC token. Platform wallet integration
- ✓ Q3/2020 Newscrypto advertisement service. Newscrypto video tutorials launch, Platform signal section
- Q4/2020 Mobile App release. New crypto sentiment indicator
- Q1/2021 Demo trading. Platform staking option. New platform tools and indicators release
- Q2/2021 Private chat integration
- Q3/2021 Newscrypto trading bot. Collaboration with top educational institutions
- Q4/2021 AI price prediction
- Q1/2022 User interaction options on the platform. New platform tools and indicators release
- Q2/2022 Live video trading lessons. Upgraded whale alert indicator
- Q3/2022 Shadow trading. Messenger price alerts
- Q4/2022 Virtual trading support. Community prediction section 2.0
- Q1/2023 Providing know-how and financial service for crypto projects. New platform tools and indicators release
